

Prajwal Sah

Computer Engineering Final-Year Student | AI & CyberSecurity Enthusiast | Full-Stack Web Developer

Email: prajwalsah726057@gmail.com | Phone: +977-9808899736 | Location: Bhaktapur, Nepal

GitHub: <https://github.com/Iam-Prajwal> | LinkedIn: <https://www.linkedin.com/in/prajwal-sah-61327739b>

Professional Summary

Final-year Computer Engineering student with proven experience developing and deploying software solutions across web, AI, and data-driven domains. Skilled in Python, Django, JavaScript, C++, and collaborative software development, with a portfolio that includes publicly deployed platforms and research-oriented projects. Adept at problem-solving, rapid learning, and working within multidisciplinary teams to deliver impactful solutions. Seeking opportunities to contribute to innovative engineering teams while expanding expertise in software development, artificial intelligence, and cybersecurity.

Education

Bachelor of Engineering in Computer Engineering <i>Khwopa Engineering College, Bhaktapur</i>	2022 – Present
Higher Secondary Education (+2 Science) <i>Khwopa Higher Secondary School, Bhaktapur</i>	2022
Secondary Education Examination (SEE) <i>Sainik Awashiya Mahavidyalaya, Bhaktapur</i>	2020

Technical Skills

Languages	Python, C, C++, JavaScript, HTML, CSS
Frameworks & Libraries	Django, Flask, MERN-Stack, Bootstrap, Tailwind
Databases	PostgreSQL, MySQL, MongoDB
Developer Tools	Git, GitHub, VS Code, LaTeX, Wordpress

Projects

Tourism Services & E-Guide Web Application <i>Tech Stack: Django, HTML, CSS, JavaScript, PostgreSQL</i> Live View	<u>Municipality Project</u>
- Contributed primarily to UI/UX design and frontend development, while also assisting in backend integration, for a tourism web platform developed in collaboration with Bhaktapur Municipality to digitally promote local culture, heritage, and tourism services. - Built responsive, user-friendly interfaces using HTML, CSS, JavaScript, and Django, integrating tourism service modules and event systems. - Collaborated with a cross-functional team across full project lifecycle — planning, development, testing, and deployment.	
Fallacy Detector & AI Reasoning Assistant <i>Tech Stack: Python, AI/ML, NLP, LLM APIs, Browser Extension</i> View Project	<u>Hackathon Winning Project</u>
- Developed an AI-powered logical fallacy detection and reasoning assistant delivered through a browser extension, enabling users to analyze online content and arguments directly within their browsing experience. - Integrated Natural Language Processing and Large Language Model APIs to identify fallacious reasoning patterns, evaluate argumentative structures, and generate contextual explanations with reasoning-based feedback. - Designed a lightweight and user-friendly extension workflow for real-time text analysis, critical thinking assistance, and educational feedback across web platforms. - Collaborated within a fast-paced hackathon team environment to rapidly prototype, develop, and present the solution, leading to winning the AI/ML Track at KU Hackathon 2025.	
Spotify Clone Web Application <i>Tech Stack: Django, HTML, CSS, JavaScript</i> View Project	<u>Individual Project</u>
Built a full-stack music streaming web application with user authentication, playlist management, and responsive playback UI inspired by Spotify's design system.	
Canteen Management System <i>Tech Stack: C++, graphics.h</i> View Project	<u>Team Project</u>
Designed and built a GUI-based desktop application to automate university canteen operations including billing, order	

processing, and inventory management.

Jarvis AI Personal Assistant

Individual Project

Tech Stack: Python, SpeechRecognition, pyttsx3, REST APIs /

- Developed a Python-based voice-activated AI assistant capable of executing natural language commands using speech recognition and NLP.
- Implemented features including web browsing automation, real-time weather updates, Wikipedia queries, system controls, and multi-API integrations.

Repository Management System

Individual Project

Tech Stack: Python, PostgreSQL

- Developed a version-control simulation system with PostgreSQL database integration for structured repository and file-state tracking.

Additional Mini Projects: Snake Game (HTML, CSS, Vanilla JS) | Tic-Tac-Toe (HTML, CSS, Vanilla JS) | Restaurant Booking Website (WordPress) | Portfolio Website (HTML, CSS-Bootstrap, JS)

Research & Ongoing Work

- Developing an **LSA-Agent**, a privacy-preserving Agentic RAG framework for automated security incident investigation using Wazuh SIEM and local LLMs.
- Exploring AI-driven threat hunting, MITRE ATT&CK mapping, and on-premise cybersecurity analytics for data-sovereign environments.
- Investigating the performance of local language models in cybersecurity incident analysis and alert triage.

Achievements & Certifications

- **Winner — AI/ML Track, KU Hackathon 2025** [[Certificate](#)]
- **2nd Runner-Up — Hult Prize at KhEC 2023** [[Certificate](#)]
- **National CEEL Conference 2026** [[Certificate](#)]
- **LaTeX Typesetting Training** [[Certificate](#)]
- **Arduino Programming & Prototyping Training**

Leadership & Extracurricular

- **Graphic Designer**, IT Circle — Khwopa Engineering College: Designed promotional materials and visual assets for college technical events and club activities.
- Actively participated in hackathons, ideathons, and competitive technical challenges, demonstrating problem-solving under real-world constraints.
- Experienced in Agile-style team-based software development with roles spanning UI/UX, backend, and project coordination.
