

Prajwal Sah

Student Ambassador at GeeksForGeeks | AI & CyberSecurity | Full-Stack Web Developer

Email: prajwalsah726057@gmail.com | **Phone:** +977-9808899736 | **Location:** Bhaktapur, Nepal

GitHub: <https://github.com/lam-Prajwal> | **LinkedIn:** <https://www.linkedin.com/in/prajwal-sah>

Professional Summary

Final-year Computer Engineering student with production-level experience in Django web development and machine learning integrations. Proven track record of delivering real-world solutions, including a municipal e-tourism platform and an award-winning AI hackathon prototype. Passionate about building secure, data-driven applications and actively researching Agentic RAG frameworks for cybersecurity.

Education

Bachelor of Engineering in Computer Engineering

2022 – Present

Khwopa Engineering College, Bhaktapur

Higher Secondary Education (+2 Science)

2022

Khwopa Higher Secondary School, Bhaktapur

Technical Skills

Languages	Python, C, C++, JavaScript, HTML, CSS
Networking & Security	Kali Linux, Wazuh SIEM, MITRE ATT&CK, Wireshark
Frameworks & Libraries	Django, Flask, MERN-Stack, Bootstrap, Tailwind
Databases	PostgreSQL, MySQL, MongoDB
Developer Tools	Git, GitHub, LaTeX, WordPress

Projects

Tourism Services & E-Guide Web Application

Municipality Project

Tech Stack: Django, HTML, CSS, JavaScript, PostgreSQL | [Live View](#)

- Spearheaded UI/UX design and frontend architecture, while also assisting in backend integration, for a tourism web platform developed in collaboration with Bhaktapur Municipality to digitally promote local culture, heritage, and tourism services.
- Collaborated with Bhaktapur Municipality across the full project lifecycle to successfully deliver the platform, navigating strict requirements and rigorous technical reviews.

Fallacy Detector & AI Reasoning Assistant

Hackathon Winning Project

Tech Stack: Python, AI/ML, NLP, LLM APIs, Browser Extension | [View Project](#)

- Developed an AI-powered logical fallacy detection and reasoning assistant delivered through a browser extension, enabling users to analyze online content and arguments directly within their browsing experience.
- Integrated Natural Language Processing and Large Language Model APIs to identify fallacious reasoning patterns, evaluate argumentative structures, and generate contextual explanations with reasoning-based feedback.
- Developed a lightweight browser extension that analyzes argumentative structures in real-time, achieving 68% accuracy in identifying logical fallacies during the KU Hackathon.
- Collaborated within a fast-paced hackathon team environment to rapidly prototype, develop, and present the solution, leading to winning the AI/ML Track at KU Hackathon 2025.

Canteen Management System

Team Project

Tech Stack: C++, graphics.h | [View Project](#)

- Designed and built a GUI-based desktop application to automate university canteen operations including billing, order processing, and inventory management.

Spotify Clone Web Application

Individual Project

Tech Stack: Django, HTML, CSS, JavaScript | [View Project](#)

- Built a full-stack music streaming web application with user authentication, playlist management, and responsive playback UI inspired by Spotify's design system.

Jarvis AI Personal Assistant

Individual Project

Tech Stack: Python, Speech Recognition, pyttsx3, REST APIs |

- Developed a Python-based voice-activated AI assistant capable of executing natural language commands using speech recognition and NLP.
- Implemented features including web browsing automation, real-time weather updates, Wikipedia queries, system controls, and multi-API integrations.

Repository Management System

Individual Project

Tech Stack: Python, PostgreSQL

- Developed a version-control simulation system with PostgreSQL database integration for structured repository and file-state tracking.

Additional Mini Projects: Snake Game | Tic-Tac-Toe | Restaurant Booking Website (WordPress) | Portfolio Website

Research & Ongoing Work

- Developing an **LSA-Agent**, a privacy-preserving Agentic RAG framework for automated security incident investigation using Wazuh SIEM and local LLMs.
- Exploring AI-driven threat hunting, MITRE ATT&CK mapping, and on-premise cybersecurity analytics for data-sovereign environments.
- Investigating the performance of local language models in cybersecurity incident analysis and alert triage.

Achievements & Certifications

- **Student Ambassador – GeeksForGeeks Campus Mantri 2026** [[Certificate](#)]
- **National CEEL Conference 2026** [[Certificate](#)]
- **Winner – AI/ML Track, KU Hackathon 2025** [[Certificate](#)]
- **2nd Runner-Up – Hult Prize at KhEC 2023** [[Certificate](#)]
- **LaTeX Typesetting Training** [[Certificate](#)]
- **Arduino Programming & Prototyping Training**

Leadership & Extracurricular

- **Graphic Designer**, IT Circle – Khwopa Engineering College: Designed promotional materials and visual assets for college technical events and club activities.
- Actively participated in hackathons, ideathons, and competitive technical challenges, demonstrating problem-solving under real-world constraints.
- Experienced in Agile-style team-based software development with roles spanning UI/UX, backend, and project coordination.
